

NEON[®] ONE | Relay board - solid state 4x

General description

The NEON[®] ONE | Relay Board – Solid State provides 4 solid-state relays for fast and wear-free switching within the NEON[®] ONE platform. Designed for integration with the NEON[®] ONE | HUB, it ensures high switching reliability and longevity, making it ideal for controlling pumps, valves, and other process components in industrial and water treatment applications. The module offers stable, interference-free operation and is optimized for high-frequency switching applications.

Item Number: 19516007K

Technical specifications

Number of outputs	4
Output type	Single Pole Single Throw
Max. voltage	250 V AC
Max. current	3 A
Switching	Transistor
