

NEON[®] ONE | Analog Output Module 2x

General description

The NEON[®] ONE | Analog Output Module provides 2 galvanically isolated outputs for transmitting measurement values and control signals within the NEON[®] ONE platform. Designed for seamless integration with the NEON[®] ONE | I/O Board, it enables precise 0/4–20 mA signal transmission to external devices. The module ensures stable and reliable analog communication.

Item Number: 19516012K

Technical specifications

Number of outputs	2
Output type	Current, active
Output range	0-20 mA
Galvanic isolation	Yes, individual galvanic isolation & other modules
Max. resistance	500 Ohm
