

NEON® ONE Platform

Smarter Water Quality Monitoring.
Built for Real-World Demands.

The NEON® ONE platform is a flexible, cloud-ready solution for modern water quality monitoring. It combines smart sensor management, intuitive controls, and modular design to meet the demands of today's treatment systems.

KEY BENEFITS

AGNOSTIC INPUTS

Compatible with both analog and digital signals — allowing easy integration and system upgrades without replacing existing infrastructure

CLOUD CONNECT READY

Enable remote access, over-the-air firmware updates, and live system visibility (with Cloud Connect Premium)

FULL-COLOR LCD TOUCHSCREEN

Modern, intuitive interface for local control, and real-time insight with built in safety features

REMOTE UPDATES

Keep systems current with over-the-air firmware updates (Cloud Connect Premium required)
